

Quality Policy

Document No.:
QM-Annexure-D

Echelon Artificial Systems is committed to the design and manufacturing of Beam Pump Structures (Beam Pumping Units) for use in the petroleum and natural gas industry. We consistently deliver products that meet customer requirements, applicable statutory and regulatory obligations, and internationally recognized standards, including API 11E and API Specification Q1 (latest edition).

Our strategic direction is centered on operational excellence, product reliability, and long-term value creation for our customers and stakeholders. We maintain and continually improve an effective Quality Management System that incorporates risk-based thinking, process control, technological advancement, and disciplined execution across all business functions.

We establish measurable quality objectives aligned with our corporate goals and are committed to continual improvement of the effectiveness of our Quality Management System, processes, infrastructure, and workforce competency to enhance customer satisfaction and sustained business performance.
